

Stankevicius Media Credit Bank

The Challenge

Disruptors and innovators are born from startups and SMEs yet these entities lack capital for marketing and technology development, especially in the early, pivoting and new product release stages.

At SMCB, we tackle these issues by providing direct financing solutions on credit basis so that more ideas can go to market.

We are more than a standard bank giving loans to companies and founders..

Our background lies in advertising and technology development since 2013

We have served over 600 International clients from all continents for public relations and strategic advertising matters with objectives to deliver growth, visibility and reputation.

Media and advertising

We have developed advanced financial banking technologies and numerous web, app and blockchain applications till this current date.

Technology

We've been in the industry for a decade and we are here to fill up some of the gaps that are still occurring in the modern business environment by providing direct and customized financing solutions to startups and SMEs exclusively for advertising technology development.

Our Special Source

Banks fall due to an unorganized supervision and careless practices towards own clients

At SMCB, it is our job to make the client succeed in business. Otherwise we lose our money. Yet, we are not a VC nor a control seeking shareholder. We are simply a good business partner that cares for the client.
